EDUCATION

Wofford College — Spartanburg, SC

Expected May 2027

Bachelor of Science in Computer Science, Emphasis in Data Science · Minor in Economics · GPA 3.3

Southern Conference Academic Honor Roll · ITA Scholar-Athlete — maintained while competing 20+ hrs/week as an NCAA Division I athlete

Coursework: High Performance Computing, Software Engineering, Econometrics, Data Structures & Algorithms, Computer Organization & Architecture, Programming Languages, Data Science

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, SQL, R, Standard ML, Racket, HTML/CSS

Frameworks & Frontend: Next.js, React, Tailwind CSS

Data & Backend: PostgreSQL, Supabase (Auth, Storage, Edge Functions, Row-Level Security), REST APIs, Deno, Anthropic API

Tools & Deployment: Git, Vercel, Netlify, ESLint, ReportLab

Certification: AWS Cloud Practitioner — exam scheduled September 2026

PROJECTS

StackedRoster — Independent College Tennis Rankings Platform | stackedroster.net

May 2026 – Present

Sole developer of a live public platform ranking NCAA Division I men's and women's tennis from ITA match data. Next.js 16, React 19, TypeScript, Tailwind, Supabase/Postgres, Vercel — ~16,000 lines over 100+ commits.

- Designed a **two-stage ranking engine**: a PageRank-style convergence graph over the full match-result set, iterated to a 0.001 threshold, followed by a points-table re-rank of the top band — calibrated against the ITA's published point totals on pinned reference lists.
- Built the ingestion pipelines that pull rosters, singles and doubles results and tournament data from the ITA API into a Postgres schema maintained across **13 tracked migrations**, running on scheduled GitHub Actions workflows.
- Built an **LLM news agent** (Anthropic API) that drafts articles from ranking movements behind a human review queue — no generated copy and no roster mutation reaches the site without approval.
- Shipped "The Stack" full-strength team metric, team pages, player profiles, search, and a public methodology page that shows the ranking's working against the official ITA list.

Book Nook Lane — Bookstore Operations Platform | booknooklane.com

May 2026 – Present

Sole developer of the platform an independent bookstore opens on — inventory, sales, event bookings and public site content all run through it.

- Designed a **7-table PostgreSQL schema** with row-level security on every table: anonymous visitors read published events and nothing else, while inventory, sales and customer records are reachable only by an authenticated admin.
- Replaced a paid third-party form service with a native booking flow — public submissions write through a single **SECURITY DEFINER** Postgres function with a honeypot, so the site never gains direct write access to customer tables.
- Built a **Deno edge function** on a database webhook that emails the shop on every booking via the Resend API, designed to fail open so an email outage can never lose a booking. Added a bilingual EN/IT site and a content editor for a non-technical owner.

EXPERIENCE

Technical Director & Camera Operator — TerrierVision, Wofford Athletics

April 2025 – Present

- Operate the video switcher for live multi-camera NCAA Division I broadcasts carried on **ESPN+** and Southern Conference digital platforms, executing the director's calls in real time on a live feed with no opportunity for a retake.
- Run graphics and overlay insertion during live play, and operate camera across multiple sports.
- Work as part of a 5–10 person production crew on a fixed broadcast schedule.

Student-Athlete — Wofford Men's Tennis

August 2023 – Present

- Compete in NCAA Division I Southern Conference play while carrying a full course load, committing 20+ hours per week to training, travel and competition.
- Operate inside a diverse, multinational squad; recognized twice for academic performance alongside a full competition schedule.

ADDITIONAL

Work authorization: F-1 student. Eligible for 12 months of OPT on graduation in May 2027, plus the 24-month STEM extension — **36 months of authorized full-time employment** before sponsorship is required.

Languages: English and Italian (fluent) · Spanish and French (basic)
